The Full Moon Phase - 17-19 May 2019

The second weekend is aligned with the Full Moon Phase. This is mainly associated with completeness, sustainability, responsibility and accountability. The projects presented in this phase are critically engaged with the ongoing state of colonialism in former empires such as the former French and Belgian colonies, where colonialism makes itself felt in multinational extractivism activities or national and international laws for newcomers.

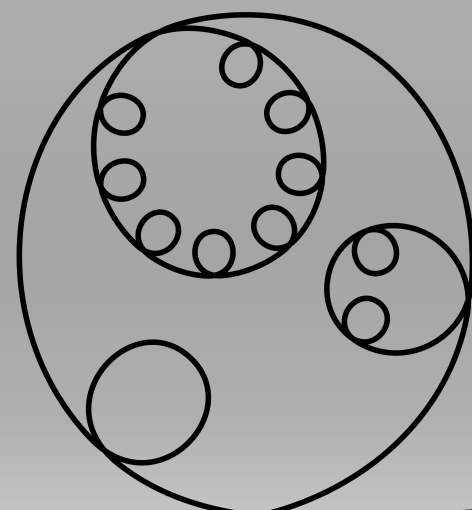

14:00 - 18:00 Dijlepad bij
