Mechelen

Contour Biennale is one of the most easily recognizable, large-scale exhibition platforms in Belgium: a unique initiative engaging with local and international artists who focus on the moving image and its wider representation in installations, sound and performance. The 9th edition of Contour will take on a whole new form. The projects presented during Contour Biennale 9: Coltan as Cotton are inspired by and relate to the city of Mechelen, its inhabitants and, more broadly, Belgium's recent colonial history.
