

Constant is an interdisciplinary arts lab active since 1997. With an interest in the culture and ethics of the World Wide Web, Constant's artistic practice is inspired by the way that technological infrastructures, data exchange and software determine our daily lives.

Free software, copyright alternatives and (cyber)feminism are important threads running through Constant's activities.

Constant organizes workshops, print parties, walks and 'Verbindingen/Jonctions' meetings for a public that likes experiments, discussions and all kinds of exchanges.
